# LOGO VARIATIONS

The PlayRugby logo has two main colour variations, and two layout orientations.

On a white / light background, the 'POS' (positive) version should be used.

On a navy / dark background, the 'REV' (reverse) version should be used.

The only variation to these, is a full white logo, which is only to be used if either of the above logos don't stand out enough on the supporting background colour.

**Example:** Full White should only be used when needed for contrast on a background colour where teal or navy won't stand out.

## USAGE

### CORRECT USAGE

Custom font, colouring, and proportions, using the PlayRugby logos supplied.

### INCORRECT USAGE

Do not replace the custom PLAY font with any alternatives.

Do not squeeze or stretch the logomark. Proportions must stay the same.

Do not manually move or adjust the position of words 'Play' and/or 'Rugby'

# COLOURS

Our PlayRugby colours have been aligned with the overarching Rugby Australia brand.

The three colours to the right, are the only colours to be used in the PlayRugby brand identity – for the logomark and accompanying typography.

We use HEX or RGB colours for all 22 screen applications. CMYK is the preferred default print colours. Pantone PMS is for specialty single colour printing.

# FONTS

The typography used in the PlayRugby logomark is an important part of the brand identity.

Fonts have been custom-designed in order to fit the Rugby AU overarching masterbrand, therefore need to be used in order to keep brand cohesion and recognition across all content.

Utilising various font weights, as shown on the right, will help create hierarchy and ensure all designs are well-balanced and easy to digest for viewers.
